

Why "Dig & Replace" your culverts? Rehabilitate with...

WEHOLITE®

- A culvert sliplining system

- Simple way to extend the service life of deteriorated culverts
- Minimal traffic control
- Lower construction costs
- Minimal social and environmental impact
- No post-installation road problems
- Cost-effective permanent solution

- Profile-wall HDPE pipe
- Available in 5.03m (16.5') and 7.62m (25') laying lengths
- Pipe sizes from 460mm (18") to 3050mm (120") ID
- Conforms to ASTM F894
- Utilized by various DOTs, Municipalities, Cities, Towns and Counties

Ideal for rehabilitating existing culvert sites, especially those:

- With aggressive waters and/or corrosive soils
- Where road salts are applied
- Under high volume roads
- With high fills
- Requiring extensive traffic detours

Why is Weholite® the “Liner of choice” for culvert sliplining projects?

Recommended by
specifiers and contractors

- Corrosion resistant
- Greater abrasion resistance than other traditional culvert materials
- Hydraulically efficient (Design Manning ‘n’ factor of 0.01)
- UV Resistant
- Long service life (50+ years) for lower life-cycle cost
- Installs quickly and easily without requiring the use of special equipment
- Smooth outer wall for easy insertion
- Long laying lengths for faster installation
- Lightweight construction for transport efficient loads as well as enabling the use of light-duty lifting equipment
- Allows for fast field length adjustments with standard cutting tools
- Tough and durable permitting installations at sub-zero temperatures and also decreases the likelihood of pipe damage during handling and installation
- Extensive product offering for maximum flow capacity and minimal grout quantities

Thread-Loc Joint*

- Weholite’s unique “Thread-Loc” joint enables municipal maintenance crews or contractors to rehabilitate deteriorated culverts without excavation
- Joint assembly is fast and positive
- OD of joint is the same as the pipe enabling an easier insertion and tighter fit

* Thread-Loc Joint not available in USA for pipe sizes of 1200mm (48”) ID and smaller
